

ACEPOOL

WELLNESS CERAMICS • GRES ARAGON

ACEPOOL es la marca de cerámica para piscinas de interior y exterior, deportivas, instalaciones wellness y balnearias. Gracias a nuestro amor por el detalle y al exclusivo catálogo de piezas especiales de acabado, nos adaptamos a las necesidades técnicas de cada proyecto y las preferencias de nuestros clientes.

En Gres Aragón nos gusta ofrecer seguridad, higiene, durabilidad y resistencia con nuestros materiales. Por eso nuestros pavimentos, escaleras, terrazas y piscinas tienen alta resistencia al tránsito, son antibacterianos, impermeables y antideslizantes. Están hechos para durar.

En Gres Aragón también cuidamos de la Tierra y de nuestra tierra. Estamos comprometidos mediante una gestión sostenible de nuestros productos, la generación de 0 residuos, la fijación de la población rural y compartiendo la riqueza en nuestro entorno.

Y, sobre todo, en Gres Aragón nos gustan los desafíos, cada nuevo proyecto, cada nuevo cliente, es una oportunidad para adaptarnos a sus necesidades y... sus sueños.

ACEPOOL is our tile brand for indoor and outdoor pools, sports pools, wellbeing facilities and spas. Thanks to our passion for detail and our exclusive range of special tile pieces, we have products able to fit in with all possible preferences and to meet the technical needs of each and every project.

At Gres Aragón, we guarantee hygiene, safety, durability and a high resistance. Floors, stairs, terraces and swimming pools clad in our products stand out for their high resistance to traffic, imperviousness, anti-bacterial properties and non-slip grip. Our products are made to last.

At Gres Aragón, we also care for the planet and the local environment. Through sustainable management of our products, we are committed to zero waste, the maintenance of the rural population and to sharing wealth locally.

And, above all, at Gres Aragón, we love to be faced with new challenges. Each new project and each new client is an opportunity to demonstrate our ability to meet their needs and to make their dreams come true.

Piezas señalización Marking tiles

PIEZAS PERSONALIZADAS CORPORATIVAS

Gracias a la tecnología de inyección digital **Klinkjet** podemos realizar piezas de señalización personalizadas, así como piezas con logotipos, advertencias, señaléticas de peligro y un sinfín de diseños que ayuden a personalizar cada proyecto y cada instalación. Contacta con fábrica para más información.

CORPORATE CUSTOMIZED TILES

Thanks to **Klinkjet** digital injection technology we can make custom signalling pieces, as well as pieces with logos, warnings, danger signs and a myriad of designs that will help you to customize each project and each installation. Contact with factory for more information.

SISTEMAS DE CORONACIÓN

EDGING SYSTEMS

El uso de piezas cerámicas porcelánicas o klinker para el revestimiento completo de una piscina supone una **resistencia total** tanto a los agentes químicos o naturales utilizados en el tratamiento de aguas, como a los productos y métodos de limpieza utilizados en las instalaciones y entornos acuáticos. Además, todas las piezas cerámicas porcelánicas y klinker son idóneas **para uso tanto en exteriores como en interiores, aportando los elementos necesarios** para que las instalaciones cumplan la normativa. Aportan, también, calidez y confort a los espacios acuáticos y zonas aledañas.

ACEPOOL dispone de una amplia oferta de sistemas de coronación tanto desbordantes como no desbordantes, así como de piezas de base y de acabado, para piscinas que cumplen con todo lo anterior y que proporcionan un sinfín de posibilidades para crear diseños únicos, sea cual sea el estilo o inspiración.

Los **sistemas de coronación desbordantes** son sistemas para piscinas con canal perimetral de rebose compuesto por piezas porcelánicas o klinker fabricadas por extrusión que se pueden colocar sobre piezas de hormigón prefabricado o directamente sobre la estructura del vaso. Sus principales ventajas son:

- **La facilidad de instalación**, simplificando al máximo el proceso desde el hormigonado o gunitado del vaso, requiriendo únicamente superficies de partida planas;
- **La disminución de tiempos de ejecución y materiales** necesarios;
- Los acabados de **mayor calidad**.

Las piezas de borde desbordante son recibidas por las piezas de hormigón prefabricado y cumplen una **triple función**:

- **Estructural**: al aportar la inclinación necesaria para generar un borde desbordante tipo playa,
- **De revestimiento**: al ser el último material de acabado de la piscina,
- **De seguridad**: al poseer resistencia al deslizamiento en su superficie y delimitar claramente la ubicación de la arista del vaso mediante un color más oscuro, además de contar con una hendidura que permite servir como asidero.

When our porcelain or klinker tiles are used to line, edge and surround the whole of a pool, they guarantee **full resistance** to both the chemicals or natural agents used to treat the water and to the cleaning products and cleaning methods used there. All our porcelain and klinker tiles **can be used indoors and out**, where they **fulfil all the necessary requirements** of relevant standards. They also bring warmth and comfort to pool and spa facilities and their surrounding areas.

ACEPOOL manufactures a wide range of coping systems for overflow and non-overflow pools, in addition to field tiles and special tiles pieces so as to ensure pools able to meet all the above guarantees. Its systems also offer broad design potential, allowing for the creation of one-of-a-kind pools, whatever the style or source of inspiration.

Overflow coping systems are suitable for pools with perimeter overflow channels. Made of extruded porcelain or klinker tiles, they can either be laid on top of precast concrete gutters or else directly round the edge of the pool. Their main advantages are:

- **Easy installation**, simplifying the process to the full from the moment the inside of the pool is concreted or gunited. All that it requires is a flat substrate;
- A **reduction** in installation **times and materials**;
- **Better-quality** finishes.

The overflow coping tiles are laid on top of precast concrete gutters, where they fulfil a **triple function**:

- **Structural** support by providing with the necessary sloping edge for overflow pools;
- **Cladding** because this is the top covering round the pool;
- **Safety**, thanks to the tiles' non-slip grip and role in marking the edge of the pool with their darker color and groove, which can also be used as a hand grip.

TIPOS DE SISTEMA DE BORDE DESBORDANTE TYPES OF OVERFLOW COPING SYSTEMS

SISTEMA B-33 B-33 SYSTEM

Sistema adaptado a piscinas no necesariamente deportivas. Se compone de un borde desbordante y aloja también la rejilla cerámica, bien en su versión rígida o en su versión flexible. Puede utilizarse la cerámica directamente sobre la estructura del vaso o combinarse con las piezas de hormigón B-33 para generar el soporte del borde y el canal perimetral.

A specially adapted system also suitable for pools not for sports use, made up of overflow coping tiles which can accommodate a rigid or flexible ceramic grating. The coping tiles can be laid directly on the concrete edge of the pool or on top of B-33 supporting precast concrete gutters.

SISTEMA GA-SPA GA-SPA SYSTEM

Sistema compuesto por una única pieza porcelánica que realiza la función de borde y apoyo de rejilla, para piscina deportiva, capaz de alojar los dos anchos estándar de rejilla de 245 y 195 mm sin necesidad de cortar o adaptar piezas. Se puede colocar directamente sobre la estructura del vaso con las piezas porcelánicas de revestimiento del interior del canal o en combinación con las piezas de hormigón prefabricado (GA-SPA).

A system for sports pools, made up of porcelain tiles that act as both a coping tile and support for a grating. This system can accommodate gratings in two standard widths (245 and 195 mm wide) without having to cut or adapt the tiles. The tiles can be laid directly on the concrete edge of the pool and also used to line the overflow channel or they can be laid on top of precast concrete gutters (GA-SPA).

SISTEMA FINLANDÉS FINNISH SYSTEM

Sistema compuesto por una pieza de borde más apoyos de rejilla, que se puede colocar directamente sobre la estructura del vaso con las piezas porcelánicas de revestimiento del interior del canal o en combinación con las piezas de hormigón (GA-SPA). Es capaz de alojar los dos anchos estándar de rejilla de 245 y 195 mm sin necesidad de cortar o adaptar piezas.

A system made up of coping tiles that also act as a support for a grating. The tiles can be laid directly onto the concrete edge of the pool and also used to line the overflow channel or they can be laid on top of precast concrete gutters (GA-SPA-U). The tiles can accommodate gratings in two standard widths (245 and 195 mm wide).

SISTEMAS DE BORDE NO DESBORDANTE NON-OVERFLOW COPING SYSTEMS

Los sistemas de coronación no desbordantes son ideales para aquellas piscinas que bien por dimensiones o bien por circunstancias no requieran de un canal perimetral de rebose. Es posible coronarlas mediante bordes rectos o tradicionales redondeados, que permiten conservar las posibilidades de diseño y continuidad de la playa o interior del vaso y coronar de forma segura la piscina. Se puede acompañar a estas coronaciones o playas con una rejilla cerámica de idéntico acabado para canales de recogida de aguas superficiales y evitar su vertido al vaso.

Sea cual sea el sistema de coronación instalado, los sistemas ACEPOOL son garantía de funcionalidad, durabilidad, seguridad, calidad y diseño, lo que se traduce en una apuesta segura.

Non-overflow coping systems are ideal for pools that do not need an overflow channel due to their size or characteristics. These pools can have straight sides or more conventional rounded ones. With this system, the design of the pool and its poolside areas can be maintained while also ensuring safe edging. The coping system and poolside area can incorporate ceramic gratings in the same finish to drain away surface water and prevent it from running into the pool.

Whichever coping system is used, ACEPOOL's systems offer the assurance of functionality, durability, safety, quality and design appeal.
